PROFILE

I'm a passionate Computer Science student with a strong interest in web development, AI/ML, and building real-world digital solutions. From crafting full-stack web applications using the MERN stack to exploring the power of machine learning with Python, I love turning ideas into working products. I'm always eager to learn, improve, and solve problems that make people's lives easier. My long-term vision is to blend technology and entrepreneurship to launch impactful tech products .

WORK EXPERIENCE

AXTRA Studio

APR_2025 - JUN_2025

MERN Paid Internship

Experience on real world client full stack projects.

- Foreign Applicant Support System
<https://gaming-tournament.vercel.app/>
- Gaming Tournament Website → NEXT JS + FIREBASE
<https://gaming-tournament.vercel.app/>
- Project Manager Tool → NEXT.JS + EXPRESS.JS
<https://project-estimation-tool-frontend.vercel.app/>

SOFTEC Competition

JUL_2025 - JUL_2025

Hackathon Participant

- Participated in the SOFTEC Hackathon, one of Pakistan's leading student tech competitions organized by FAST NUCES Lahore.
- Collaborated with a team to develop a full-stack web solution using the MERN stack within a limited time frame. Focused on rapid prototyping, real-world problem solving, and effective teamwork under pressure.

PERSONAL PROJECTS

LMS (Learning Management System)

- A full-featured LMS platform for managing courses, students, and content.
- Features: Role-based dashboards (Admin/Instructor/Student), course creation, progress tracking, file uploads, and quiz system.

AI-App

- The app integrates AI APIs (like OpenAI and others) for creative content generation, offering an intuitive, responsive interface for users to interact seamlessly with the AI features.
